

SITE MANAGER - EMOBILITY

60-100%

Location: Geneva, Switzerland

HSS13-E

Nice to have you here. Thank you for your interest.

I am **Manoj Nambiar** leading the **High Voltage and Drives technology** division within INP. We are a well-coordinated team of 25 experts, the majority of whom are from Switzerland. From time to time, freelancers from around the world also support us. We collaborate with our clients in Switzerland and abroad in engineering, project management, construction management, supervision, as well as in commissioning. The **Substation Brig** and the **Substation Daxlanden** are just two examples from our wonderfully varied project portfolio.

We want to strengthen our team with colleagues who are reliable and are at their best when they work independently and can make their own decisions. However, you should also always be a team player and offer others your advice and support when needed. In return, I offer you all my knowledge and experience from 25 years in engineering and project management to help you achieve your goals.

I look forward to receiving your application and getting to know you. Should you have any questions, please give me a call on +41 56 552 19 20.

P.S. You can get to know more about some of the INP team [here](#).

Exciting tasks for you:

- Representation of the company on-site as the interface between customers, authorities, subcontractors, and project site personnel in all technical matters
- Ensuring smooth process flow at the construction site and leading construction teams
- Execution and monitoring of project performance in areas such as cost, schedule, technical advisory services, environmental, health, and safety aspects (HSE), as well as quality
- Ensuring compliance with local regulations and guidelines
- Leading projects for continuous improvement with the aim of operational excellence
- Daily communication with the Customer Care Manager and subcontractors

How you can help us:

- Degree in Electrical- or Mechanical Engineering with a minimum of 5 years of experience with project sites
- Thorough knowledge in the sector for electrical equipment installation and commissioning
- Broad knowledge of installation processes for e-mobility equipment
- Excellent communication skills with the ability to build strong working relationships with colleagues, customers, and suppliers
- Clear understanding of reporting site progress, weekly reports, technical reports and method of statements
- Fluent in French, good knowledge of English and German is a plus

What's in it for you?

- We are well networked leading us to get the really exciting projects of well-known clients
- In the INP team you can count on a network of like-minded people and advice from other experienced experts
- For us, character, knowledge and experience are important - not your origin, gender or age
- We don't do everything, our focus is on the energy industry, a sector with the best prospects for the future
- Over the last 20 years, we have grown from a handful of visionaries to several dozen professionals
- We have kept our family spirit and look after each other
- Only well-informed employees can deliver optimal performance. That is why we regularly provide transparent information
